SUMMARY

WordPress developer (ACF, CPT, JetEngine) with a strong frontend focus in React. 2 years of experience across digital marketing agencies and freelance projects, with close attention to detail and strong visual and design sensibility in every implementation. Experience resolving security incidents, optimizing performance, and developing internal automations with n8n and API integrations to streamline operational processes. Collaborative by nature, with a strong ability to learn quickly and adapt to new challenges.

EXPERIENCE

Web Developer — Agencia Lader

Buenos Aires, Argentina (Remote) · Oct 2024 — Jun 2026

- Built and maintained WordPress sites (Elementor, JetEngine, ACF, Code Snippets) e-learning platforms with LearnDash, and online stores on WooCommerce and Tienda Nube for multiple agency clients simultaneously.
- Served as the sole frontend developer on a land-plot management web app, building the interface with React.js and Tailwind CSS and integrating REST APIs developed in Python alongside a backend developer.
- Diagnosed and resolved security incidents (SEO poisoning) on client sites, including compromised code cleanup, preventive hardening, internal documentation, and technical reports for clients.
- Built custom components and functionality in WordPress using PHP, AJAX, and Code Snippets.
- Led the exploration and implementation of internal automations using n8n and Google Apps Script, including a Telegram bot integrated with Google Sheets and Drive to streamline the collection, filtering, and tracking of team invoices.
- Collaborated with design, development, and PM teams to translate Figma designs into high-fidelity implementations under tight agency deadlines.
- Participated in daily standups, retrospectives, code reviews, and debugging processes, contributing to problem-solving and continuous improvement across projects.

Frontend Developer — Freelance

Córdoba, Argentina (Remote) · 2024 — Present

- Responsible for building responsive UI and web components adaptable across multiple devices.
- Managed the full freelance project lifecycle (requirements gathering, proposal, development, delivery) in direct contact with each client.
- Built Tienda Nube online stores, institutional websites, and custom landing pages for clients referred by paid media agencies, prioritizing load speed and SEO.

Frontend Developer — Expresia

Burnaby, British Columbia, Canada (Remote) · Jul 2024 — Dec 2024

- Developed frontend interfaces with HTML5, CSS, and JavaScript on a DXP-based CMS with Handlebars.js.
- Handled HTTP requests and form data validation, including reCAPTCHA integration.
- Implemented animations and micro-interactions with GSAP, and built responsive components with Bootstrap, adapting to the standards of a remote international team.

Jr. Frontend Developer — No Country (Professional Practice Contract)

Córdoba, Argentina (Remote) · Aug 2023 — Mar 2024

- Responsible for building reusable, responsive UI components and interfaces.
- Integrated REST APIs to fetch and manage dynamic data in web applications.
- Actively participated in daily standups, sprint planning, reviews, and retrospectives to ensure efficient, quality deliveries.
- Collaborated effectively within the team using Git and GitHub, working alongside UX/UI designers, testers, and backend developers.
